

LEVEL 5 RISK AND REGULATION IN BANKING (RRB)

RRB will provide you with knowledge of the risks that banks face in the current environment and the regulations put in place to ensure the stability of the banking sector.

The qualification explores the fundamentals of risk and how it is measured and managed. You will also learn about the causes and consequences of the global financial crisis and how banks are regulated and must carefully manage a wide and diverse range of stakeholders.

Key Information

- On demand registration
- Flexible online study to fit around your life
- Online access to comprehensive study materials
- Assessed through a multiple-choice exam
- Contributes to achievement of the Chartered Associate Programme

Programme Structure

This qualification is designed for distance learning providing you with the flexibility to study at a time and pace that suits you. Your studies are supported through a range of comprehensive online and/or hardcopy learning materials.

Assessment

The qualification is assessed through a two-hour multiple-choice question exam with instant feedback of result.
